

DHEERAJ GAMI

Frontend Developer | Backend Developer | MERN Stack Developer

■ 7999744425 | ✉ dheerajgami22@gmail.com, GitHub - <https://github.com/dheerajgami>, [LinkedIn](#)

PROFESSIONAL SUMMARY –

Frontend Developer with 1 year of hands-on experience (including 6 months internship and 6 months live project development) specializing in React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, REST APIs, Node.js, Express.js, PostgreSQL, and MongoDB. Experienced in building responsive web applications, integrating APIs, optimizing application performance, and collaborating in Agile development environments.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, Tailwind CSS, Responsive Web Design
- **Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication
- **Database:** PostgreSQL, MongoDB
- **State Management:** Context API, Redux Toolkit
- **Tools & Technologies:** Git, GitHub, Postman, Swagger, VS Code
- **Concepts:** API Integration, Component-Based Architecture, Authentication & Authorization, CRUD Operations, Cross-Browser Compatibility, Performance Optimization, Debugging, Agile/Scrum Methodology

PROJECTS

Petro Coin (Backend Development) - [Link](#)

- Developed 20+ RESTful APIs using Node.js and Express.js for user authentication, merchant management, customer onboarding, token management, and transaction processing.
- Implemented Role-Based Access Control (RBAC) with JWT authentication for Admin, Merchant, Customer, and Fuel roles, ensuring secure access to protected resources.
- Designed and developed a token generation, verification, and redemption system, enabling secure token issuance, validation, and transaction workflows across multiple user roles.
- Designed and integrated a PostgreSQL database with optimized schemas, relationships, and queries to efficiently manage users, transactions, merchants, and token records.
- Improved backend performance by implementing input validation, centralized error handling, query optimization, and secure API practices, resulting in reliable and scalable application performance.

Leap East (Frontend Development) - [Link](#)

- Developed responsive and interactive user interfaces using React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, and Tailwind CSS.
- Built reusable React components and implemented client-side routing, protected routes, and state management using React Router.
- Improved application performance through code splitting, lazy loading, memoization, and responsive design, resulting in faster page rendering.
- Implemented new UI features, resolved frontend bugs, and ensured cross-browser compatibility, accessibility, and responsive layouts across desktop and mobile devices.

Infograins Software Solution Pvt. Ltd (Frontend Development) - [Link](#)

- Developed responsive and interactive company website interfaces using React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, and Tailwind CSS.
- Built reusable UI components and integrated RESTful APIs with the frontend to enable seamless communication with the Python-based backend.
- Worked with PostgreSQL to manage dynamic website content and perform CRUD operations through backend APIs.
- Optimized website performance, responsiveness, and cross-browser compatibility to deliver a smooth user experience across desktop and mobile devices.
- Participated in debugging, testing, API integration, and deployment while improving website functionality and overall performance

PROFESSIONAL EXPERIENCE

Full Stack Developer | Infograins Software Solutions

Mar 2026 – Present

- Developed responsive and interactive web applications using React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, and Tailwind CSS, delivering modern and user-friendly interfaces.
- Built reusable UI components and integrated RESTful APIs to enable seamless communication between frontend and backend services.
- Worked with backend technologies including Python, Node.js, Express.js, PostgreSQL, and MongoDB to support API integration, data management, and CRUD operations across multiple projects.
- Optimized application performance, responsiveness, and cross-browser compatibility while identifying and resolving bugs to improve overall user experience.
- Collaborated with cross-functional teams using Git and Agile/Scrum methodologies, participating in development, testing, code reviews, and deployment activities.

MERN Stack Developer Intern & Trainee | Mind Coders Institute

Aug 2025 – Feb 2026

- Completed an intensive 6-month MERN Stack training program while gaining hands-on experience through live project development.
- Developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js, following industry best practices.
- Built and integrated RESTful APIs, implemented JWT-based authentication, and performed CRUD operations with MongoDB.
- Worked on frontend and backend modules, database integration, API testing using Postman, and bug fixing.
- Collaborated with mentors and team members on live projects, participating in development, testing, debugging, and deployment activities.

EDUCATION

M.Sc IT | School of Computer Science & IT, DAVV

2021–2023

B.Sc CS | Advance College of Science & Commerce

2017–2021
